POTENZA®

LINEARZ

DENSITY

FOR IMMEDIATE RELEASE

Melbourne, Australia – March 2026

**Advanced Skin Technology Appointed Exclusive Distribution Partner for
Potenza, LinearZ and Density in Australia and New Zealand.**

In March 2026, Advanced Skin Technology (AST), a division of Device Technologies Group, is pleased to announce it has been appointed the exclusive distribution partner for **Jeisys Medical's Potenza, LinearZ, and Density** across Australia and New Zealand, reinforcing the global medical aesthetics manufacturer's expansion in the ANZ region.

The appointment expands AST's portfolio of innovation-led aesthetic technologies, while strengthening Jeisys Medical's regional presence through a strategic collaboration that supports long-term, sustainable growth in one of the region's most dynamic medical aesthetics markets.

Headquartered in Korea, Jeisys Medical is internationally recognised for its advanced energy-based devices and precision-engineered solutions, supporting a wide range of clinical and aesthetic applications globally.

AST will lead the rollout of two innovative new treatments across Australia and New Zealand. Building on the established Potenza platform already available in the region, LinearZ and Density treatments will officially launch from 10 March 2026. Widely adopted in leading Korean aesthetic clinics, these technologies represent the next evolution in non-invasive skin tightening, regenerative treatments, and multi-modal energy delivery.

This strategic agreement reflects a shared commitment to clinical excellence, innovation, and advancing standards in medical aesthetics. Under AST's stewardship, and with Device Technologies Group significant experience in launching medical equipment to market, clinics can expect a structured and supported rollout, with a strong focus on education, training, and ongoing clinical, commercial and technical service support.

Michelle Stewart, Director of People, Brand and Innovation for Device Technologies Group

said, "This agreement represents an important milestone for both organisations. We are proud to bring Jeisys Medical's globally recognised technologies to Australia and New Zealand through a trusted and proven local distribution model."

Rachel Ahn, Jeisys Medical Australia's Director of Business Development in the region shared

"Jeisys Medical Australia is pleased to appoint Advanced Skin Technology as our exclusive distribution partner for Potenza, LinearZ, and Density across Australia and New Zealand. AST brings a strong track record in clinically led market development, practitioner education, and high-quality practitioner support, well aligned with Jeisys' commitment to clinical excellence. We are confident that this partnership will bring a successful launch of our flagship platforms in the ANZ market."

AST will serve as the primary point of contact for Potenza across Australia and New Zealand from 10 March 2026. LinearZ and Density are scheduled to launch across the region in May 2026. Clinics interested in learning more can contact AST at customerservice@advskin.com.au

About Advanced Skin Technology (AST): AST is a leading provider of clinical skincare and medical aesthetic devices in Australasia, committed to delivering cutting-edge technology and education to the aesthetic industry.
