

Dermapen Microneedling Symposium

2023 Australian Tour

Presented by

Dr. Andrew R. Christie-Schwarz

Clinical Director and Global Medical Trainer for DermapenWorld

The wait is finally over, INSKIN COSMEDICS is proud to announce DermapenWorld Clinical Director and Global Medical Trainer, Dr. Andrew R. Christie-Schwarz, will return to Australia in a nation-wide tour this May. A must-attend event for leading clinicians, join us as we revolutionise how the industry approaches the modern patient to deliver comprehensive, effective, and evidence-based solutions.

This two-day symposium offers advanced micro-needling experts an exclusive opportunity to refresh, upskill and immediately introduce the latest in micro-needling knowledge from around the globe in clinic for elevated treatments and results.

Focus on the NEW in an introduction to DermapenWorld's latest Meso-Glides, products, treatments, protocols, and technical advancements!

This advanced microneedling symposium is for medical and aesthetic professionals wanting to take their treatments to the next level.

STATE	LOCATION	DATES
QLD	Brisbane	Monday 8 th and Tuesday 9 th May
NSW	Sydney Olympic Park	Wednesday 10 th and Thursday 11 th May
VIC	Melbourne	Monday 15 th and Tuesday 16 th May
SA	Adelaide	Wednesday 17 th May
WA	East Perth	Thursday 18 th and Friday 19 th May

Ticket purchases are non-refundable. If the event is cancelled or postponed, a full refund will be provided in accordance with consumer law.

Tickets:

An open event for both Dermapen and non-Dermapen Partners:

One Day: \$349

Two Days: \$599

**Two day ticket eligible for single person use*

Delegate bag for each attendee valued at OVER wholesale \$300 each day.

Bookings:

INSKIN Partners, strictly via the INSKIN Intranet.

NON-INSKIN Partners email team@inskinocosmetics.com or call (02) 9712 8188.

Dermapen Microneedling Symposium

2023 Australian Tour

Day 1 - ALL STATES

Regenerative Synergies: A new approach to mechanical and chemical revision with Dermapen, Exo-Skin, MG-Collection and ÜBER Peeling.

SYMPOSIUM OUTLINE

- Key focus of the day, learn about the revolutionising NEW Exo-Skin for in-clinic and home use.
- Explore how the ÜBER Pro Peel and NEW ÜBER MD Peel offer the ultimate in chemical regeneration including indications, ingredients, applications, protocols, and treatment videos.
- Hear how the MG-Collection will help maximise Dermapen 4 regenerative solutions for advanced skin results.
- Innovative case studies are explored with video demonstrations to support theoretical and practical components.
- *SOUTH AUSTRALIA ADDITIONAL: *Covered in SA on day 1, all other states covered in Day 2. ** Synergistic solutions with 4-Dimensional Rhytid Reduction for fine lines and wrinkles, and the launch of Dermapen HOME.

A SESSION WITH A FOCUS ON NEW! - As the largest growth area in aesthetics, regenerative procedures too often rely on autologous (PRP) therapies where patient's age, health and lifestyle determine treatment success or outcomes. As the new benchmark for skin rejuvenation, DermapenWorld revolutionises aesthetics with innovative mechanical and chemical approaches.

NEW EXO-SKIN: The key focus of the day, overcome the traditional limitations of autologous and donor dependant procedures like PRP with the birth of a new regenerative force. Exo-Skin unlocks unparalleled, unprecedented, and revolutionary regenerative potential for next level results.

Surpassing traditional mesotherapy, the MG-Collection synergies maximise chemical regeneration with targeted complexes to address pigmentation, acne, scars, ageing, striae, and vascular disorders. With bio-identical ingenious blends of telomere technology, retinaldehyde and free radical and reactive oxygen species scavengers to promote optimised skin function and skin imbalances at the source.

Anabolic/Chemical peeling with ÜBER PRO and the newly reformulated NEW ÜBER MD completes the chemical and physical regenerative synergy to enhance the rejuvenating cascade. Maximised by some 1920 puncture channels per second this trilogy of powerful forces Dermapen 4, MG-Collection and ÜBER peeling deliver the most comprehensive revision of skin integrity, function, quality, and health.

Day 2 - QLD, NSW, VIC, WA

Synergistic Solutions - The treatment of the most common aesthetic indications and NEW methods and innovations from DermapenWorld.

SYMPOSIUM OUTLINE

- Explore synergistic solutions with new approaches to treat:
 - Acne
 - Post acne scars
 - Striae
 - Melasma
 - Rosacea
 - Ageing
- Learn the NEW 4D Rhydit reduction treatment protocol utilising the NEW ÜBER MD
- Explore the NEW Dermapen HOME, EXCLUSIVE to Dermapen 4 ATP partners and how to maximise your client results.
- Each module features comprehensive in-clinic and patient homecare protocols.

Assessing pathophysiology and contributing genetic, extrinsic, intrinsic, and environmental factors, this comprehensive symposium explores synergistic solutions with new approaches that target and treat the most common in clinic skin disorders including a **NEW 4D Rhydit treatment protocol** for fine lines and ageing.

Exploring exclusive protocols with unique combination therapies, an alliance of in-clinic treatment programmes are maximised via a holistic approach of patient topical homecare, diet and lifestyle considerations. As a true synergy, all aspects of skin function and deterioration are addressed as part of a mechanical and chemical rejuvenation.

Innovative case studies are explored with video demonstrations to support theoretical and practical components. New products including the **NEW Dermapen HOME** (exclusive to Dermapen 4 ATP partners) and Exo-Skin are highlighted and explored to promote even greater aesthetic influence to satisfy the desires of the modern patient.
